

SHOW PREVIEW

LG Motion Ltd
Motion solutions for the professional

LG Motion Ltd – Stand P43

Basingstoke, December 2009: LG Motion will be showing a selection from its wide range of medium to high precision linear and rotary positioning stages, linear bearings, motors, drives, motion controls and specialised motion components. The Basingstoke based manufacturer and distributor represents a number of leading motion control equipment and systems suppliers in addition to having its own in-house production and design facility that can handle customised positioning and automation system assemblies.

LG Motion has recently been appointed as an official Encoder Distributor for Heidenhain (GB) Ltd and will be showing some of the German manufacturers high precision linear and rotary position encoders.

The recently announced A25 and A40 series manual and motorised elevation stages will also be on view as a part of LG Motion's own range of high precision linear and rotary positioning stages plus medium precision UniSlide, BiSlide and XSlide™ dovetail-slide linear tables. All of these products are now featured in a new 40 page catalogue which will be available to order or to take away.

A selection of high precision linear guide bearings from Schneeberger's MONORAIL range which is available on a two day cutting service turnaround will be shown along with SMAC Europe electronic moving coil actuators, positioning stages and electronic control solutions.
